FLEXIBLE BUILDINGS

52' (ENG, GER, FRE)

Never before have there been so many people on Earth. The new world creates new challenges for us living together, one of the biggest being the infrastructure in the world we live in.

How can we ensure that the cities anonymizing and isolating its inhabitants become places of encounter again? How can we use technology to create new spaces in areas where there is no space left? How can sustainable construction revolutionize the construction industry? - In the search for answers, the documentary presents current concepts and implementations from the core disciplines of architecture, development of building materials, and urban design.

Original Title: Flexible Räume - Die Zukunft des Bauens

Year: 2019

Produced by: Hoferichter & Jacobs, MDR, arte
