GRØNLAND - IN THE GLARE OF ICE

45' (ENG, GER)

Greenland is the largest island in the world and the landmass closest to the North Pole.

80% of the country is covered by a layer of ice up to 3000 meters thick. Most of the inhabitants of the country are spread over the breathtaking landscape of the ice-free west coast. The country is mostly inhabited by Inuit, who have been feeding on what nature has provided them for thousands of years. But the original life is in a state of change. The modernisation of society and man-made global warming threaten the Arctic natural paradise that is so incredibly important for our planet. Through the eyes of locals we get to know the authentic Greenland.

Original Title: Grönlands Wilder Westen

Year: 2020
