## LIFE FROM SPACE

2 x 52' (ENG, GER), 2 x 45' (GER)

**Discover the new insights on the universe and the origin of life that put us in the middle of a Copernican revolution.**

In this two-part series, we take a look at the monumental discoveries underway, specifically surrounding black holes and meteorites. Black holes have been revealed as one of the foundations for the basic conditions of life. Through black holes, life is possible in an infinite number of places in space. We also follow how meteorites brought the basic substances of life to our planet, allowing for its creation. The films describe the latest findings concerning cosmic events in relation to the origin of life, providing a grandiose perspective of what makes life possible.

### Episodes:

1. Black Holes
2. Asteroides and Meteorites
