CORONA DIARIES

45' (ENG, GER), 60' (GER), 90' (GER, ENG subs)

The Corona pandemic has changed almost every aspect of our lives. We trace 30 days of the pandemic – using material filmed by protagonists all around the world with their mobile phones.

Corona has changed our lives and sense of time. On March 9th, Italy declared the entire country as a restricted zone. On March 16th, Germany went into Lockdown. It all seems so long ago. The documentary traces 30 days of the pandemic – using footage filmed by protagonists all around the world with their mobile phones. They recount their extremely personal stories of their everyday life in the form of a global video diary: the nurse at the Corona station in Spain, the virus researcher in France, the truck driver in Germany, the photographer in Iran, the student in China, the construction worker in India, the young girl in the refugee camp in Greece, the activist in Sao Paolo, and the delivery boy in New York.

Original Title: Corona-Chroniken – Ein Virus verändert die Welt

Year: 2020

Produced by: Berlin Producers
