

THE WORLD IN 30 MINUTES

THE ICE TRUCKERS OF YAKUTIA

30' (GER, ENG subs)

Under severe temperatures in the barren north of Russia, only the brave dare to make the journey to deliver supplies.

Alban Modun works a very dangerous job. With an overloaded truck, he drives on the icy roads of the coldest inhabited region in the world: Yakutia, Russia. He delivers flour to cities that can only be reached by land during winter. The winter road is rebuilt every year, crossing frozen rivers, lakes, and marshlands. At temperatures as low as minus 60 degrees Celsius, it is difficult for people and vehicles to reach their destination. Will Alban be able to deliver his cargo within six days as planned?
