

HISTORY

NAZI SECRET WEAPONS

52' (ENG)

Driven by the necessities of WWII, German engineers and designers helped pioneer some of the most sophisticated military machinery in the world.

Just prior to the end of WWII, the German military secretly undertook a massive push to design miracle weapons such as colossal tanks and the world's first guided missiles and long-range bombers that could attack New York. The technology advanced generations in little more than a decade and the machines were on a grander scale than reached even today. Now, nearly 60 years later, a team of experts examine the original blueprints to determine if these so-called Wunderwaffen, or "wonder weapons," could have changed the outcome of the war.
