## HEAVY LIFT

3 x 45' (ENG, GER)

**The story of the engineers and mechanics behind some of the largest lifting and moving equipment in the world.**

This series tells the story of how huge objects move. If Archimedes said "Give me a lever and I will move the world", today the answer is usually wheels and hydraulics. Lifting and moving massive machinery or structures is the speciality of a handful of companies and the equipment they use is often tailor made for the job, be they cranes, trailers, flatbeds, barges, and even ship carriers.

Original Title:	Schwere Lasten
