## RURAL DESTINATIONS IN THE WORLD

13 x 30' (ENG, GER, SPA)

**In a world where the fast paced life of metropolitan cities have infiltrated every aspect of daily life, everyone is searching for that one place where one can let one's hair down.**

These hidden gems do exist and it will be our honour to escort you there. Rural Destinations in the World is a thirteen-episode documentary series that shows great vacation spots in Spain, Israel, Germany, Morocco, Colombia, Germany or Japan. It takes you on a trip around the regions of the world that are almost untouched by modernization. Until recently, tourism meant a search for exotic destinations, idyllic beaches or endless tours across populous cities; in short, it was what we call "mass tourism". Nowadays, the average tourist looks for destinations that differ greatly from the frenzy of today's lifestyles.
