BERLIN FROM ABOVE

52'(ENG), 90'(GER)

Unique pictures from above. This documentary shows a different angle of people and country, during a glide flight above the metropolis.

More than 25 years after the reunion between East and West Germany, this movie shows pictures from different perspectives. Which visions and dreams marked this region? What changed and what emerged in Germany's tensed city. We take a look from above to see the city and its citizens. Due to high quality flight recordings and panorama pictures, we are able to see how the people make this area their home.
