SIBERIA'S ROLLING CLINIC

45' (ENG, GER)

We take you on a journey through the siberian winter on a rolling hospital.

Lonely, cold and inaccessible – isolation is the leading cause for poor medical provisions in Siberian villages. But now the Russian government is providing medicine trains – rolling hospitals – to ensure basic medical care for all. From surgery rooms to modern laboratories, the trains are well equipped. We travel through the world, which only knows nine months of winter. We meet people, who live a simple life and work hard. And we accompany doctors, who sacrifice themselves, to help as many people as possible.

Original Title: Mit dem Medizinzug durch Sibirien
