## AMNESIA - WHEN LIFE BECOMES A STRANGER

45' (GER, ENG subs)

Two days after her 50th birthday Jeanette K. suddenly falls into a faint. She awakes in the hospital with her memory completely wiped clean - Even her son is like a stranger to her.

"I remember, he came through the door and I just thought, what a kind young man, maybe a nurse. I could not identify him." She even had to learn her own name from the doctors. Soon came the diagnosis: amnesia! A restless search for the past begins. Acquaintances, friends, family – all the people that surround her she has to get to know again.
