HARBOUR OF THE FUTURE

52' (GER, FRE, ENG subs)

Plans for future harbours must begin now: new developments must be anticipated and trends must be recognized. With the growing sizes of container ships, harbours have to handle increased amounts of cargo in shorter time frames.

Consequently, the digitalized era has infiltrated the harbours. We will show you how with autonomous vehicles, cargo can be delivered to storage independent of drivers and containers can be unloaded from the comfort of the office. But wouldn't an automated harbour make workers obsolete?

Original Title:	Hafen der Zukunft
