# SUIVRE LA DORDOGNE

2 x 45' (ENG, GER, FRE)

**The Dordogne - a stream of crystal blue that flows between the Volcanoes of Massif Central and Europe's largest river delta, the Gironde estuary.**

The landscape and the atmosphere of this region have undergone extreme and dramatic change – what was once harsh and rugged have become overwhelmingly charming and rich in delights. The film features encounters with the people who have shaped the region into what it is today. It is an expedition of discovery through the caves of the Stone Age, the divine rocky plateaus and many other provinces for which this river was once the hub.

Original Title: Entlang der Dordogne

Year: 2017

Produced by: Prounen Film, arte
