NAMIBIA - THE SPIRIT OF WILDERNESS 4K

52' (ENG, GER)

With more than 300 days a year, the sun dominates this country so much that it's even shining from their flag.

It's a barren land, sometimes it's like it's from another planet but still familiar. It is land of contrasts and colours with wide landscapes and fascinating deserts. Influenced by various cultures during colonization and now reborn from the shadows of Apartheid in 1990, Namibia gives a beautiful collage of culture, language, art, music and food.

Original Title:	Namibia - The Spirit of Wilderness 4K
Year:	2016
