LAPLAND SNOW ADVENTURE

40' (ENG, GER)

Experience an unforgettable adventure in the icy coldness of northern Scandinavia's Lapland region.

Lapland is a region in northern Fennoscandia, largely within the Arctic Circle. It stretches across Norway, Sweden, Finland and Russia. The nature is varyingly diverse. The hills and the coastal area of the sea form great differences in altitude. Experience an unforgettable adventure in the icy coldness of northern Scandinavia's Lapland region. Ride to the Arctic polar circle on a snow mobile, minus 20 degrees fahrenheit, through snow tundras, over frozen rivers and lakes, and through snow-covered forests.
