

HISTORY

THE END OF RED OCTOBER

45' (ENG)

At the end of the Cold War the Russian Navy, bereft of funds, abruptly decommissioned 100 nuclear powered submarines leaving behind a massive nuclear waste disposal problem.

Once the pride of the USSR, the Soviet's fleet of nuclear submarines now lies rusting in the remote fjords of Murmansk. In *The End of Red October*, a concerned team of engineers takes on the challenge of cleaning up this nuclear mess and laying this Cold War relic to rest.
