## CHINA'S BALLOONING CITIES

45' (ENG, GER)

**Megacities with no historical precedent are being created in Asia. Gigantic superstructures that defy even the ziggurats of the USA and surpass the volume and height of any buildings in Europe are being built.**

Entire miniature villages with parks, kindergartens, shopping malls, administrative centres – all the necessary amenities- together with housing units and offices rear 200 to 300 meters into the sky. The so called Vertical Villages have never before been built or imagined - not even in our wildest dreams. We showcase eight projects, in the cities Chongqing, Behai, Shenzhen, Beijing, Shanghai, Ningbo and Wuhan.

Original Title: China's Explodierende Städte

Year: 2015

Produced by: Prounen Film, ZDF, 3sat
