TICKET TO THE FUTURE - THE EVOLUTION OF TRAVEL

52' (ENG, GER, FRE)

The sky is the limit: step into the future with new forms of transport. Innovation in transport technology will defy the boundaries of physics.

Nothing is as closely connected to the advancement of humankind as the way we travel. Industry and globalization have been preoccupied with technologies that allow us to travel faster and farther into the world. Consequently, mobility has garnered great economic importance. However, due to technological advancements, our means of transport have become more and more inefficient, more harmful to the environment and more precarious. It's time to revolutionize the way we travel.

Original Title: Mit Vollgas Voraus - Wohin führt unsere Mobilität?

Year: 2017
