FLOWER CHARM

30' (GER)

Every year, it fascinates us again and again: the fireworks of nature - the beautiful flowers and plants blossoming into full bloom.

The leading producer of flowers is Holland, not only in the tulip department, but also the orchids. But flowers and plants are not only beautiful, they are also useful. They supply bees and butterflies with vital pollen and nectar and people with tasty leaves and flowers. They also have healing powers, which are used for medicine and natural cosmetics.

Original Title: Blütenzauber

Year: 2015

Produced by: NZZ
