UNEQUALAND

3 x 45' (GER, ENG subs)

How unequally is money distributed in Germany? And when are you considered to be rich? This 3-part series gets to the bottom of these questions and sheds light on how wealth becomes power.

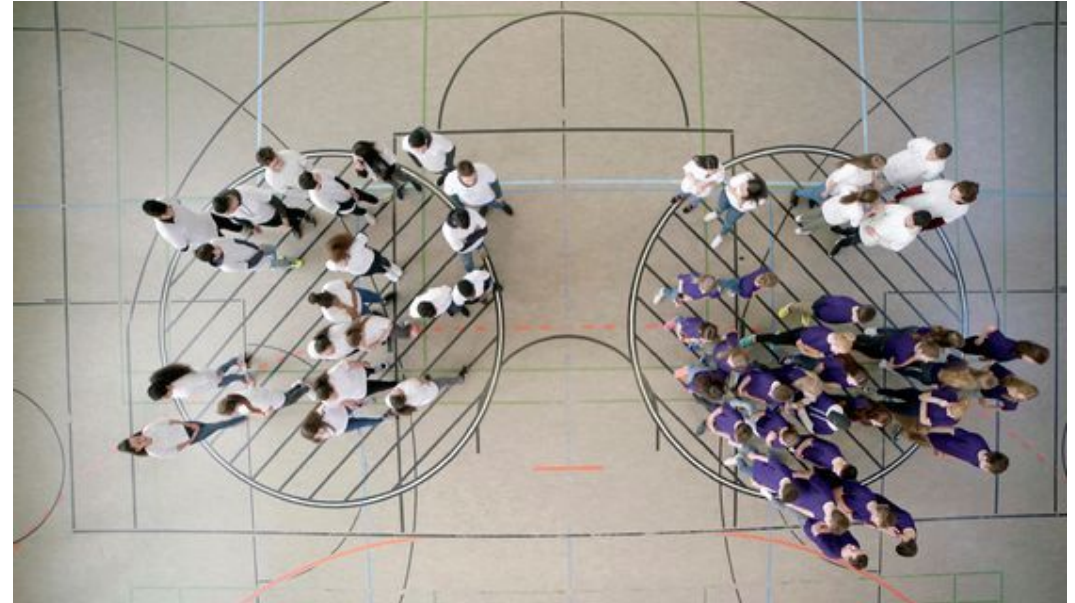

One result: The views on this vary greatly - depending on which class of population you ask. So what counts? Performance - or the family you are born into? Unequaland is seeking answers from the world's leading researchers and data analysts, such as Nobel Prize-winning economist Joseph Stiglitz, sociologist Jutta Allmendinger or economist Raj Chetty
