# WE ARE THE 99% - KARL MARX TODAY

55' (GER, ENG subs)

**He has conjured up the ghost that once bypassed the whole of Europe: Karl Marx, an authoritarian know-it-all with untamed hair. And this ghost is just coming back to the Europe of today.**

Karl Marx survived Marxism. Antimarxism too. And he is still the most quoted economist in the world. In the film he returns to earth and appears in London, Brussels, Berlin and Trier. His image is the living projection of our longing for a saviour. The world in which he moves is in a state of upheaval. Factories, residential buildings and intersections dissolve into digital "point clouds", white dots on a black background. In a "war room", 30 experts create a crisis scenario for the year 2026.

Original Title:	Fetisch Karl-Marx
