## MEXICO - MI AMOR

3 x 45 (GER, FRE, ENG subs)

**Mexico - a country that has recently been associated with Donald Trump and his plan of building a wall to keep America safe from Mexican drug cartels, crime and illegal immigrants. But beyond violence and poverty there is a growth that gives people hope.**

Today, Mexico manages to take advantage of its cultural differences, which were shaped by pre-Columbian civilizations as well as by Spanish and American influences. This colourful mixture is reflected in the gastronomy, art, music and everyday life. International tourism has been growing and makes the country an absolute trend destination. We are interested in the modern Mexico, whose people refer to their history, but are proud of breaking new ground and have visions for their country.
